Portfolio

Education

Veermata Jijabai Technological Institute, Mumbai

Aug 2023 – Aug 2027

B.Tech in Electronics and Telecommunication Engineering

CGPA: 8.62

Minor in Artificial Intelligence and Machine Learning

Sau. Kamal Dawale Jr College, Akola

2023

SSC: 98.80% HSC: 91.67% MHTCET: 99.29%

Experience/Internships

Open Source Contributor – stdlib (JavaScript Standard Library)

Jan 2026 – Present

Contributor (50+ PRs merged, 17+ open)

- Contributed extensively to a large-scale numerical and scientific computing library for **JavaScript** and **Node.js**.
- Implemented **statistical distributions** and mathematical utilities following production-grade standards.
- Worked on low-level **C implementations** for ndarray and strided array operations to improve performance.
- Developed and optimized core functions for numerical computing, ensuring correctness and efficiency.

FinEd (Startup)

Jun 2025 – Aug 2025

Web Development Intern

Mumbai, Maharashtra

- Contributing to the development and optimization of the startup's web platform.
- Scraped dynamic financial product data from official banking websites using **Playwright**,
- Aggregated and structured over 100+ financial schemes (loans, insurance, savings) into a centralized database using **Supabase**.
- Developed a clean, interactive frontend with **ReactJS** to present real-time financial product data.

Projects

NEP Timetable Generator | *Python, Genetic Algorithm, FastAPI, React, Supabase*

Sep 2025

- Built an **AI-based timetable generator** that automated NEP-aligned university scheduling and removed manual clash-resolution efforts.
- Implemented key **constraint checks** for faculty availability, room/lab validity, and multi-hour practical sessions.
- Developed backend integration with **Supabase** and contributed to admin workflow in React for generating and viewing timetables.

Spam Detection System | *Python, LSTM, NLP, FastAPI*

Mar 2026

- Built a **spam classification system** using an **LSTM-based deep learning model** to classify messages as spam or not spam.
- Performed **text preprocessing**, tokenization, and sequence padding, followed by embedding-based feature representation.
- Trained and evaluated the model using metrics like **accuracy, precision, and recall** for reliable performance.
- Designed a **FastAPI-based backend** to serve real-time predictions with confidence scores.

SmartLink | *MongoDB, ExpressJS, NodeJS, ReactJS, Redis*

Jun 2025

- Built a smart URL shortener allowing users to shorten **multiple links into one** and open them in different tabs simultaneously.
- Integrated **real-time analytics dashboard** to track clicks, device type, and time-based usage.
- Optimized performance using **Redis caching**, reducing database load and improving redirection speed.

Technical Skills

- **Programming Languages:** C++, JavaScript, HTML, CSS, SQL, Python
- **Developer Tools:** VS Code, Git, GitHub, Postman, Jupyter Notebook, Google Colab
- **Libraries/SDKs:** Zustand, Socket.IO, Agora SDK, Cloudinary, PyTorch
- **Technologies & Frameworks:** ReactJS, Node.js, Express.js, MongoDB, Tailwind CSS, Bootstrap, FastAPI, Supabase, Redis
- **Core Concepts:** Data Structures & Algorithms, REST APIs, WebSockets, NLP (Tokenization, Embeddings), Deep Learning (LSTM), Genetic Algorithms

Leadership & Extracurricular

Community of Coders

Apr 2025 – Present

Core Committee Member

VJTI

- **Volunteer – CodeHunt Coding Event:** Helped manage registrations and ensured smooth execution of coding rounds.
